

# TEK LED

## ALL-IN-ONE LED

The Tek LED I-TV, designed in partnership with Aurora, renowned Australian-owned LED manufacturer, is an Android LED display designed specifically for large educational environments. It offers a range of features including a built-in control system, USB-C and HDMI inputs, and the ability to wirelessly present content from different devices. With its user-friendly interface and intuitive on-screen menu, this display is easy to operate without the need for complex third-party software.

Ideal for various venues: conference rooms, halls, boardrooms, auditoriums, libraries, classrooms.

Integrated design and internal integrated system, no need for external devices, user-friendly.

Versatile installation: wall-mount or trolley stand, straightforward, no complex supports.

Onboard Android providing control and wireless casting of various devices.

Panel with flash memory for calibration data, enables automatic adjustment settings.

Front access design for simple maintenance of panels, power supplies, and components.

One-button startup, easy operation, perfect for beginners without prior experience.

Aspect ratios range from 16:9 to 32:9, including 21:9 format ideal for Microsoft Teams Rooms.

# ALL-IN-ONE LED

The 16:9 format is a standard ratio that is perfect for various spaces and for displaying different types of content. The 21:9 format is well-suited for Microsoft Teams Rooms, large meeting areas, and hybrid learning environments, offering an immersive widescreen experience that enhances presentations and collaborative learning. There are options for 32:9 and 4k resolutions, with prices based on size and application. Additionally, custom sizes, impact protection, and outdoor options are also available.
